

MKGCS, LLC Awarded \$7.7 Million Contract for Command and Control Application Development Services for U.S. Army

McClellan, Va. – MKGCS, LLC has been awarded a 5-year, \$7.7 million contract to continue its support of the U.S. Army Command and Control Support Agency's application development program.

Work will be performed in the Army Operations Center, located in the Pentagon, and includes continued research and development, software engineering, network administration and command and control application fielding in support of the command's mission of support to Headquarters, Department of the Army requirements for mobilization, current operations tracking and readiness command and control efforts.. MKGCS will carry out specific tasks to develop, administer and maintain custom software as well as provide rapid contingency command and control application development in response to Army contingency operations.

MKGCS has supported the US Army Command and Control Agency's Command and Control Applications (C2APPs) program since 2001. Responding to the unprecedented requirement for large scale, but very selective mobilization of units and individuals to support the Global War on Terrorism, MKGCS rapidly developed a suite of web-based application to streamline the existing mobilization and deployment information and decision support processes for the Department of the Army.

"MKGCS has a long standing relationship with the US Army's Operations Center and the Command and Control Support Agency. We are pleased to continue supporting the Command and Control Application Development Program and the Army G3," Michael Karagiannis, president of MKGCS, LLC said. "These are key programs in supporting current mobilization and deployment planning activities and the transformation of U.S. Army mobilization to ensure the timely and effective employment of Army reserve forces to meet future challenges."

Headquartered in McClellan, Va., MKGCS, LLC provides transformational mission solutions in command and control, communications, and computers to customers in the defense communities. A small business, MKGCS is a cutting edge technology integrator, experienced at bridging mission critical legacy data systems with today's web centric environments.
